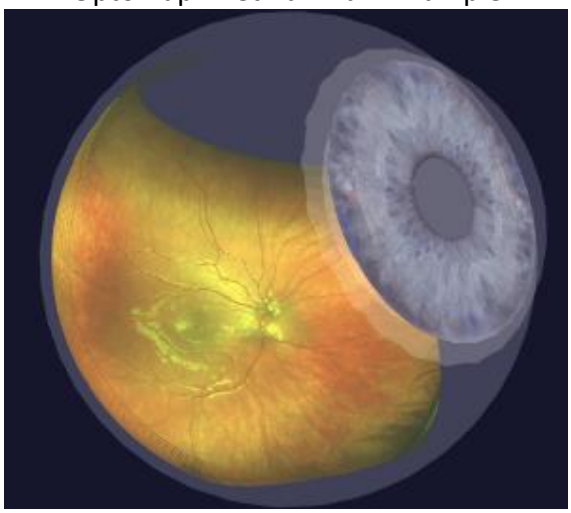
optomap®
ultra-widefield retinal imaging

Eye M.D. Monterey is proud to offer our patients the best possible care. Because of this we recommend the Optomap® Retinal Exam for every patient. This non-invasive procedure allows your doctor to see a much broader and more detailed view of the retina than is possible with conventional methods. When reviewed, the scan becomes a permanent part of your medical file, enabling your doctor to make important decisions should potential vision threatening conditions show themselves today or in the future.

As part of your evaluation we may capture Optomap® images for review by your doctor during your examination today. **There is a $40.00 fee for this procedure**. Any questions you have about the Optomap® Retinal Exam can be directed to the staff or your doctor when the images are reviewed with you during your examination.

Optomap® Retinal Exam Example



_____ I elect to have the Optomap Digital Retinal Image of my Retina for $40.00.

_____ I DECLINE the Optomap Retinal Imaging.
